

Exploration of the Campaign Contribution Data

Purpose. The purpose of this assignment is to provide a way for you to develop your skills in exploring and visualizing data. You can use Google Colab or Jupyter notebooks.

Instructions. Download [campaign-exploration.ipynb](#). This is a Jupyter notebook that contains problem cells in which you are to enter your own code. Read the instructions at the top. The file [campaign-exploration.pdf](#) shows the output for my code. You should attempt to create output like the output of my code. Be sure to use meaningful titles and axis labels.

The notebook contains all packages you are to use -- do not import any other packages.

Submission. Submit your edited campaign-contribution.ipynb on iLearn. Important: make sure the whole notebook runs from top to bottom without errors before submitting it.

Please ask if you have any questions about submission.

Grading. 10 points/question.
